

Multi-Head Combination Weigher

Versatility

BBC Technologies Multi-Head Combination Weigher is designed to weigh a variety of products, including dry and frozen goods. It is also compatible with a wide range of form-fill sealers and can be easily adapted to suit your changing needs.

Speed & Accuracy

The Multi-Head Combination Weigher is capable of processing high-speed weighments with impeccable accuracy. Using our intuitive 'Smart Combination' process technology, it is capable of making up to 100 weighments per minute at an accuracy of 1-2 units of product.

User Interface

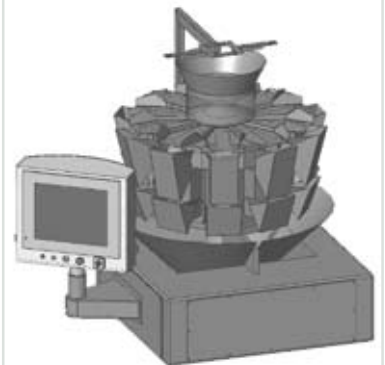

The user interface has been designed with simplicity in mind. Using a touch screen monitor, the user can easily select target weights and play modes with the touch of a button. The machine is also WiFi enabled, allowing the user to view data and change settings on a PDA device, when away from the machine.

Design

Designed and assembled in New Zealand, the Multi-Head Combination Weigher is built in stainless steel and particular care has been taken in to ensure the machine can be cleaned easily. Components can be safely and easily removed and the machine can be sprayed down from all angles (IP rating 64).

Software

Our machines are FreshTracker™ compatible, allowing the user to trace product and analyse data reports sent directly to your computer. Software updates are also downloaded to the machine automatically.
